

IVAN DARASHEVICH

Software Quality Assurance Engineer

Belarus · +375 (29) 540-95-08 · van0the0ne@gmail.com · <https://www.linkedin.com/in/van0the0ne>

SUMMARY

Software QA Engineer with 2 years experience of testing desktop and web applications (native and cross-platform). Skilled in UI testing with DevTools, API testing with Postman, and creating detailed test documentation. Currently advancing automation expertise in JavaScript with Playwright/Cypress, leveraging a strong foundation in manual and API testing to deliver reliable, high-quality software.

PROFESSIONAL EXPERIENCE

Manual QA

December 2023 – Present

Credo-Dialogue, Minsk

The company specializing in the development of engineering software for tasks such as geodesy, geology, mining, transport construction, and cadastral work.

- Improved testing processes during task discussions and initial analytics, reducing defect leakage and improving test coverage.
- Identified 100+ high-severity defects pre-release, ensuring zero critical production incidents and protecting company reputation.
- Executed full QA cycle for two new web applications, enabling on-time release with stable performance and user acceptance.
- Documented 1500+ high-quality defect reports with reproducible steps, improving developer turnaround and reducing reopen rate.
- Optimized regression testing plan, cutting execution time by 30% while maintaining full coverage of business-critical features.

Manual QA (trainee)

Belhard Academy, Minsk

February 2023 – April 2023

IT education provider in Belarus, offering courses and internships in programming, software testing, business analysis.

- Tested LMS system, identifying usability and UX issues that improved overall user experience.
- Reviewed and validated technical requirements and documentation, preventing potential defects before development.
- Analyzed API requests and responses using DevTools, verifying status codes, headers, and network performance.
- Executed comprehensive API testing in Postman, achieving full coverage of critical endpoints.

EDUCATION

Belarusian State University, Bachelor's degree in Engineering – Geodesy and Aerospace Cartography.

CERTIFICATES

- JavaScript Test Automation (powered by EPAM)
- Software Testing Engineer
- Stepik Certificate: Interactive SQL trainer
- Apache JMeter Intro

SKILLS

QA: Functional Testing, Regression Testing, UI Testing, Test Cases

Automation: JavaScript/TypeScript (Playwright, Selenium, Cypress) – [My Github](#)

Tools: Postman, DevTools, Git, Jenkins, Jira, Confluence, SQL, Apache JMeter

LANGUAGES

- English – B1, actively improving toward B2
- Russian – Native
