## **SUMMARY**

Software QA Engineer with 3+ years of experience in testing web and desktop applications. Skilled in UI testing, API testing, and producing comprehensive test documentation to deliver reliable, high-quality software. Proven ability to streamline QA processes, detect critical defects early, and maintain high software quality. Currently focused on developing expertise in automation using JavaScript / TypeScript to accelerate testing and improve software reliability.

## **PROFESSIONAL EXPERIENCE**

### **Manual QA**

**December 2023 – Present**

#### **Credo-Dialogue, Minsk**

The company specializing in the development of engineering software for tasks such as geodesy, geology, mining, transport construction, and cadastral work.

- Executed full QA cycle for desktop and web applications, enabling on-time delivery with stable performance and user acceptance.
- Optimized regression testing plan, cutting execution time by 30%, maintaining full test coverage of business-critical features.
- Improved testing processes during task discussions and initial analytics.
- Identified 400+ high-severity defects pre-release.
- Documented 1700+ high-quality reproducible bug reports in Jira.
- Maintained and enhanced 50+ Python automation scripts.
- Developed comprehensive test documentation in Confluence and Zephyr.

### **Manual QA**

**February 2023 – April 2023**

#### **Belhard Academy, Minsk**

The company is a leading IT training center in Belarus. It offers practical courses in programming, testing, design, and business analysis.

- Performed UI testing of the internal CRM system using DevTools.
- Automated API testing: implemented a full set of Postman checks, achieving full coverage.
- Analyzed and tested requirements, identifying inconsistencies early and preventing critical defects in production.
- Designed testing strategy, created test plan, checklists, and detailed documentation.

## **EDUCATION**

Belarusian State University, Bachelor's degree in Engineering – Geodesy and Aerospace Cartography

## **CERTIFICATES**

- JavaScript Test Automation (powered by EPAM)
- Software Testing Engineer

## **SKILLS**

**Testing & QA:** DevTools, Postman, Git, CI/CD (Jenkins, GitHub Actions), SQL, Linux, JMeter

**Automation:** JavaScript, TypeScript, Playwright, Cypress, WebdriverIO, Selenium, Jest, Mocha

**Documentation:** Jira, Confluence, Zephyr, ClickUp
